

Process Retort Project Project Implementation

Greencore's Prepared Meals Solutions business produces chilled ready meals, chilled pasta sauces, chilled soup and quiche for the major retailers in the UK.

THE PROJECT

Greencore Prepared Meals required additional Process Retort units to manage secured business from the multiple grocer sector

THE CHALLENGE

Protolan worked directly with the Greencore team to identify best practice for the implementation of the Process Retort.

Protolan were integral to the development of a rationalised production plan which resulted in the development of a large extension to accommodate new production equipment and a new boiler house and water tower.

A smaller extension was required to house a new packaging store and airlock.

DELIVERING SUCCESS

Protolan successfully delivered this fast tracked, £3m project within an 18 week timescale.
