

Regeneration of Heinz Westwick Facility

Business critical regeneration of Heinz's Aunt Bessie's frozen potato factory.

The Challenge

Maximise process and production volumes and identify efficient capacity planning.

Delivering Success

Protolan were integral to the successful delivery of this business critical project.

Our project management team were wholly responsible for ensuring a streamlined project. Protolan managed all aspects of the project including civil work, services and equipment procurement.

Our expertise in understanding the complexity in dealing with potato properties, particularly within chilling and frying proved to be invaluable to ensure this project was a commercial success.

Complete communication across the business and streamlined project management ensured that this fast track, £7m project was completed on time and on budget.

Services utilised...

Project Engineering

Process flow Analysis

Capacity Planning
